# What is Decentralized Millionaire1?

A Millionaire1 DApp game is a decentralized application that uses blockchain technology to create a transparent and secure Millionaire1 system. It allows players to participate in a Millionaire1 game from anywhere in the world, with lower transaction fees and without the need for intermediaries

MILLIONAIRE1.IO

# Transparency and Fairness |

Blockchain technology offers the **Millionaire1** industry a much-needed boost of transparency since it is an open-source, public ledger that makes it easy for anyone to check the exact workings of the lottery. It also reduces inefficiency and fraud as it minimizes or entirely removes human error during transactions.

Alongside this, automated systems can be used to ensure that luck has less of a role in deciding who wins and who loses.

MILLIONAIRE1.IO

# | Transparent

**USDT Millionaire1** System is built on **Bsc Blockchain**, operates with high level of Autonomy with its data

MILLIONAIRE1.IO

# Truly Autonomous Winners

Random Number Generation (RNG) method  
which is used to produce winning numbers is  
secure and fair.

MILLIONAIRE1.IO

# Borderless |
